

**Application**

All signalling applications where definition and performance of the payload are important will be enhanced by the extra height achieved using a hand-held rocket.

**Description**

The 38mm Rocket Hand-fired Para Red Mk3 is a parachute suspended flare for general or distress signalling. The parachute deploys and suspends the flare underneath which maintains a steady rate of descent.

**Operation**

1. Remove top and bottom end caps and withdraw safety pin or safety catch allowing trigger lever to swing free.
2. Hold signal firmly and vertically or at a 45° - 90° angle and press lever up against rocket body. Ignition is instantaneous, with no significant launch recoil.

**Specifications**

Deployment Height @ 90°:	300 metres nominal
Flare Burn Time:	40 Seconds minimum
Height:	269 mm
Width:	47 mm
Gross Weight:	0.375 kg
NEQ:	0.156 kg
