

### Application

The Miniflare provides high intensity localised signalling for all applications including:

- > Pinpoint location.
- > Aircraft warn-off signals.
- > Personal survival.

### Description

The Miniflare signal kit provides an individual with a means of signalling. Being compact, the kit can be carried unobtrusively in operational clothing or in aircraft survival packs.

### Operation

1. Remove penjector from plastic pack and screw threaded end onto base of cartridge within the pack.
2. Withdraw penjector complete with cartridge.
3. Hold penjector vertically and fully depress trigger with thumb and release. The cartridge will fire instantaneously.
4. Unscrew spent cartridge and discard. The sequence can be repeated as required.

### Specifications

Deployment height (vertical): 75m typical  
 Burn time: 4 secs minimum  
 Overall weight: 216g nominal  
 175g nominal (Without Penjector)  
 NEQ: 0.38 kg per kit nominal  
 Dimensions: 158mm x 58mm x 21mm
