

Application

Distress signalling for day and night use when a compact and easy to use signal is required.

Description

The Signal Distress Day & Night was designed as a compact personal distress signal for naval divers and aircrew. It should be carried in any situation where a robust and waterproof personal distress signal may be required. The Signal Distress Day & Night is particularly suitable as a signal for divers who may accidentally surface away from their support craft. Waterproof down to 30 metres, it has a corrosion resistant case with 'O' ring sealing.

This dual-purpose signal consists of an orange smoke signal at one end for use by day and a red flare at the other end for use at night. Protected by interchangeable end caps, the signal has tactile ribs at the flare end to aid identification by night. The smoke and flare are operated independently and use of one does not affect the functioning of the other at a later time.

Operation

1. Select the end to be used.
2. Remove the end cap and unfold 'D' ring.
3. Hold clear of face and point down wind.
4. Lift and pull 'D' ring.

Specifications

The signal is visible from at least 5km by day and 8km by night in good conditions.

Flare: burn time:	17 secs minimum
Light intensity:	10,000 candela average
Smoke: burn time:	15 secs minimum
Overall weight::	0.235kg
NEQ:	0.090kg
